

Name: Muhammad Shazzad Mia

Project: Rokomari

Summary Report

Website Name: Rokomari

Website URL: <https://www.rokomari.com/book>

Overview: The Rokomari website is an e-commerce platform for purchasing books online. The website offers a wide variety of books from different genres, and users can easily browse and purchase books of their choice.

Design and Usability: The website has a modern and clean design with a user-friendly interface, making it easy for users to navigate and find the books they want. The search bar at the top of the website allows users to search for books using keywords, author names, or book titles. The website also has different categories of books, making it easy for users to browse and find books based on their preferences.

Functionality: The website offers a seamless browsing and purchasing experience. The add-to-cart functionality is easy to use, and users can quickly check out and make payments using different payment options. The website also offers a Wishlist feature, allowing users to save the books they want to purchase in the future.

Performance: The website has good performance with fast loading times, ensuring that users can browse and purchase books without any delay. The website also has a mobile version that is optimized for mobile devices, making it easy for users to browse and purchase books on their smartphones or tablets.

Security: The website has a secure payment gateway, ensuring that user transactions are safe and secure. The website also uses SSL encryption, providing a secure browsing experience for users.

Conclusion: Overall, the Rokomari website is a well-designed and functional e-commerce platform for purchasing books online. The website offers a wide variety of books, and the browsing and purchasing experience is seamless and easy to use. With its good performance and security features, the website provides a secure and reliable platform for purchasing books online.
